***Project: Interior Universal Access Improvements at the
Salem Witch House, Salem, MA***

We have a question. We notice that the new exterior door is to be made of pine and painted. We would like to know if Spanish Cedar would be acceptable for the exterior door only. Old growth pine is not available and new pine is not as weather resistant as Spanish cedar for an exterior door.

Also, which Hoppe New Orleans hardware do you want? Although the drawings state a cut sheet one was not supplied.

Can you also confirm that the doorstock thickness? This was scaled off the drawings

Thank you,

Gene Ricciardelli
