Re: Canal Street Flood Mitigation Project, Phase II - Contract A (S-21)
Sidewalk & Curb Replacement Notice

Dear Residents and Businesses:

Due to construction activities associated with the above referenced project, the City of Salem's contractor, P. Gioioso & Sons, Inc. will be **reconstructing your sidewalks and curbing on your street starting the week of October 16th, weather permitting. During this time, when the contractor is working at or around your property you will not have access to your driveway for approximately one week.** The Contractor anticipates completing the north side of the roadway first— starting at Lafayette, then the south side. This phase of work could take up to two months. We appreciate your patience over the course of this project and anticipate these activities to last one week at each property.

Parking on the roadway, in the work zone, during work hours will not be permitted and vehicles will be towed at the owner's expense if necessary.

If you have any questions about the project or need assistance during this time, please contact John Bobrek, Chief Resident Engineer at 617-304-4587.

We apologize for this inconvenience, and will work as quickly as possible to restore the area and complete the project. We also thank you in advance for your patience and forbearance as we complete this important project. If you have any questions, or would like additional information, please call the Engineering Department at 978.619.5673.

Very truly yours,

David H. Knowlton, P.E.
City Engineer/ DPW Director
