### **Open portion of meeting/Sanctuary for Peace Ordinance**

Many people have been coming to meetings to discuss sanctuary issue. We intentionally do not have a Guest Speaker in order to create the space for this conversation.

The role of a facilitator is to keep conversation moving and focused and to defer to people on the Committee, particularly those who were in the Planning Group.

- Where can we find a copy of the Sanctuary for Peace Ordinance?
- If ordinance passes, what actually happens? (Why put it in writing? What does it achieve?)
- Does this order protect local businesses from raids from ICE agents?
- If ICE came to Salem, would police cooperate?
- You keep hearing that they are going to take federal funding. What does that mean? Is this just connected to Sanctuary City Status? Can they do that?
- Is there any possibility of the ordinance being modified between now and the 29th?
- I think when people look back on this moment, it will be seen as a bright spot in Salem History.
- What frustrates me is that there is strong opposition. What are some of the strongest arguments against this? Why do people feel so strongly against this?
- Why are specific City Council members opposed?
- Will be nice to have City Councils on record. Remind City Council that they work for us. Remind them you live in their ward. Strategic make sure people... At large need to hear from everybody
- Could we start a petition saying that if you don't vote for this, then we are not going to vote for you?
- If you are a citizen who supports this, the best tool at your disposal is the truth. What we can do is dispel the myths and reinforce truth to our friends and neighbors. You are filling your toolbox and become better advocates in the community.
- Just talk to them the way you want to be talked to. When you make a phone call, they hear your message.
- How flexible is this set up to be? If two years from now there is an awful immigration law that violates my conscience, how flexible is this?
- The will of the people will prevail. So let's get the word out. You have seen the protests on tv. Let's take action, let's unite. Let's all be there so we can make a difference
- Is there a website? Are there articles we can look for that provide more information?
- If this were not to pass, what would happen? How would police respond? What are repercussions?
- The reason this committee exists is because of prejudice and discrimination. So continue to ask questions of those on City Council. Continue to present facts, and ask why are you against this. So then it is up to us to speak our conscience. Might not listen, but an ethical, moral voice will be present.
- Don't take any City Councillor vote for granted. Most of the fear is through ignorance. Many are fearful without understanding. This is a moral social justice issue. What value do you put on human life? What value do you put on a child not having fear that parents will still be there after school? How much federal funding would you be willing to lose for that piece of mind?
- Mayors of Cities in Western Massachusetts said human lives are worth more. We will find other funding.
- Some are using the argument: Why do we want to put a target on our back? The reason why is because you have a responsibility to take a stand. Reminiscent of the argument against accepting civil unions as equal to marriage. They are not the same.
- The more cities that do this, the harder it will be to take federal funding.
- Homeland Security Secretary gives the choice go back with your kids right away or we will send you to a detention center away from your children. This is the choice we are giving a mother. This is why we need it to be a law. Maybe it is not a perfect ordinance but we need something to start with as a starting point.
- Solidifies or codifies what we are already doing in Salem.

- Thank you for taking the lead on this. I'm proud to be from Salem, MA. Group of monks meeting with mayor at 3:30 on the 29th. Will hopefully head over to rally and City Council Meeting.
- Request made to livestream on FB Live or Periscope. Share event as it is unfolding. Let's do it live. Bring your equipment. Put the event wherever you put it. It can be seen by thousands of people who want to see it.
