to access the ZOOM  
MEETING link

Join us to learn more about the consultant team's assessment of Broad Street Cemetery and their draft recommendations for preserving the burial ground's landscape features, walls, fencing, gates, headstones and tombs. The meeting will conclude with an opportunity for questions and comments.

Broad Street Cemetery was established in 1655 and is Salem's second oldest cemetery. This beautiful historic site includes the city's largest collection of burial tombs as well as slate and marble burial markers with some of the most outstanding gravestone carvings on the North Shore. The cemetery also provides an important green space for the neighborhood with open vistas and mature trees and landscape plantings.

To preserve this community landmark, the City has embarked on a preservation master plan to identify concerns at the cemetery and to develop recommendations for future preservation work.
