

Where To Donate Textiles During The Year

(May, 2018)

Don't forget the SalemRecycles Textile Drive is held every November!

Textiles should never be placed in your curbside recycling toter, but they should never go in the trash, either! Here are year-round options for reusing and recycling them:

1. **Thrift Stores:** Good quality re-salable items can be donated to thrift stores, such as The Lifebridge Thrift Shop or Salem High School Clothes and Food Pantry.

2. **Curbside Pick Up, any quality textile, clean and dry:** If you subscribe to curbside composting with Black Earth Compost, they will collect textiles curbside. For more information reach out to Black Earth Compost:

Connor Miller, Black Earth Compost
978-290-4610; blackearthcompost@gmail.com

3. Drop off of any quality textile, clean and dry:

- a. **Recycle That** has bins where you can drop textiles and books anytime- they have gold and purple lettering. Bins are located outdoors at:

*Phoenix School, 89 Margin Street
Crosby's Marketplace, 125 Canal Street
St. Anne's Church, 290 Jefferson Avenue
St. Peter's Church, 24 St. Peters Street*

- b. **Bay State Textiles** has similar outdoor bins at all the Salem public schools. They are white with red lettering.

- c. **Goodwill Trucks** are in the Stop and Shop parking lots on Howley Street, Peabody and Paradise Road, Swampscott. They accept textiles (and just about everything else). This is a good option if you need a receipt for tax purposes.

General Guidelines for Textiles Recycling:

- No carpets or rugs, or damp/moldy items.
- All textiles are recyclable, even if they are torn, stained or have holes: shoes, towels, curtains, fabric scraps, old socks or undergarments, etc.

Did You Know?

- Textiles are sorted and the highest grade gets sold to thrift stores in the US, then overseas. Remaining textiles or scraps are shredded and recycled for industrial uses. It's not as good as re-selling, but it's the next best thing.
- According to the Environmental Protection Agency, in 2013, over 15 million tons of textile waste was generated. That's the equivalent of about 3.5 million elephants.
- It takes over 500 gallons of water to produce one cotton t-shirt. That's enough to hydrate 10 humans for an entire year.

With so many easy options, we encourage Salem residents to begin recycling ALL their old textiles. Thanks for doing your part!
